Subject: **Sanford**
Federal Project No: STP-1724(700)X
State PIN: 017247.00
Amendment No. 1

Dear Sir/Ms:

The following question has been received.

Question: I have been unable to find the sensing device that will activate the flashers. Is there one or will these flashers be on constantly?

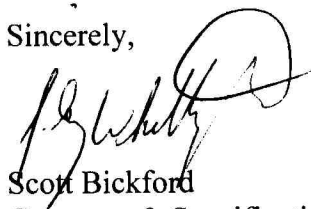

Response: The flashers will be on constantly.

Question: Where can I get a copy of DOT Standard Installations? One that will discuss the flasher housing material and housing color. Also, anything regarding acceptable flashing controller manufacturers and so forth?

Response: The "Standard Specifications" (Revision of December 2002) contains material requirements. Section 643 – Traffic Signals and Sections 715 (Lighting Material) through Section 720 will contain information pertinent to this project. A list of prequalified (Qualified Products List or QPL) products can be found on line at the below listed address;
<http://www.maine.gov/mdot/tr/qpl/index.htm>

Consider this information prior to submitting your bid on November 30, 2011.

Sincerely,

for Scott Bickford
Contracts & Specifications Engineer
